README.md

Description of this Frontend tech test

This frontend tech test will help us evaluate an applicant's hands-on JS programming skills that cover arrays, objects, functions, handling APIs, JSX, GIT and React Hooks.

Test file and instructions

```
/src/components/search.js
```

Available Scripts

Install the current project's dependencies.

```
npm install
```

Runs the app in the development mode.

```
npm start
```

Intelligent Search API

Search through content across multiple document formats, including .html, .doc, .ppt, .pdf and text documents stored in a number of systems, including Amazon Simple Storage Service (S3), SharePoint, Salesforce, Google Drive, or OneDrive.

API Documentation

<http://nlp-document-store-dev-130100662.ap-southeast-2.elb.amazonaws.com/api/nlp-document-store/docs/>

API Request Parameters

```
{
  "query": "string"
}
```

API Response

```
{
  "results": [
    {
      "excerptPage": 0,
      "highlights": [
        {
```

```
      "topanswer": true,
      "start": 0,
      "end": 0
    }
  ],
  "documentText": "string",
  "id": "string",
  "documentAttributes": {
    "additionalProp1": "string",
    "additionalProp2": "string",
    "additionalProp3": "string"
  },
  "documentUri": "string",
  "document": "string"
}
],
"numResults": 0,
"answers": [
  {
    "id": "string",
    "highlights": [
      {
        "topanswer": true,
        "start": 0,
        "end": 0
      }
    ],
    "answer": "string"
  }
],
"facets": {},
"queryId": "string"
}
```
